- Git / GitHub
- cPanel & Hosting
- Postman

SOFT SKILLS

Effective communication, agile teamwork, presentation skills, logical problem-solving, and continuous learning mindset.

COMMUNITY WORK

Active volunteer at Tam Binh Child Protection Center & SOS Children's Village HCMC (Journey of Love).

CAREER OBJECTIVE

Proactive IT student dedicated to becoming a professional **Full-Stack Web Developer** with well-defined career milestones:

- Short-term:** Solidify full-stack software architecture competencies, actively contribute to real-world production projects to gain practical engineering experience, and master cutting-edge web technologies.
- Long-term:** Advance into a core engineering lead role, taking ownership of scalable web applications that deliver measurable value and delightful user experiences.

EDUCATION

FPT Polytechnic College – Dong Nai Campus

09/2024 – 09/2026

Major: Web Development (5th Semester)

- Academic Performance: **GPA 3.65 / 4.0** - Continuous Excellent Student Award for 5 consecutive semesters.
- Capstone Projects: AI-Integrated Restaurant ERP Platform & Employee Attendance System (ARM).

FEATURED PROJECTS & EXPERIENCE

ARM – HR & Attendance Management System

11/2025 – Present

Role: Full-Stack Developer • **Tech:** PHP (MVC), MySQL, JavaScript, Bootstrap, cPanel

Live: codewithme.id.vn • **Repo:** github.com/diepvien007-nct/nguyen-chi-tam

- Architected and implemented web-based employee timekeeping, profile management, and shift scheduling.
- Designed and optimized relational MySQL tables for fast logging and automated timesheet reporting.
- Deployed web service to production cPanel hosting with custom domain and SSL certificate.

Restaurant ERP Platform with AI Assistant

Graduation Project

Role: AI & Full-Stack Developer •

Tech: PHP, MySQL, RESTful API, AI Integration, Chart.js

Live: codewithme.id.vn • **Repo:** github.com/diepvien007-nct

- Engineered end-to-end POS order management, table status tracking, and revenue analytics dashboard.
- Built automated inventory tracking with alerts for ingredient expiration dates and stock thresholds.
- Integrated conversational AI assistant providing smart insights, menu advice, and operational recommendations.

TWC – Timeless Watch Collection E-Commerce

07/2025 – 11/2025

Role: Back-End Developer • **Tech:** PHP, MySQL, JavaScript, Bootstrap, InfinityFree

Website: watchshop.kesug.com •

Repo: github.com/diepvien007-nct/nguyen-chi-tam

- Implemented clean MVC architecture, customer authentication, shopping cart, and order placement flow.
- Constructed comprehensive administration panel for product catalog CRUD and order status management.
- Successfully published to live production environment with zero high-severity vulnerabilities.
